Neomounts NM-TC100BLACK Mini PC/NUC/Thin client holder - max 5 kg - VESA 50x50-100x100 - w 1,7-7 cm - universal - black

The Neomounts NM-TC100BLACK thin client holder allows you to install a thin client computer to a monitor mount, pole or under the desk.

The thin client holder can be installed out of sight, directly to the VESA plate, behind the monitor. The NM-TC100BLACK includes VESA 50/75/100 hole pattern to simplify installation in combination with flat screens. By installing the thin client holder to the VESA plate, you can utilize the cable management of the desk mount and keep the workspace free of cables.

Additionally, the holder can be mounted to a Ø35 mm pole or to a desk. With this practical solution you do not only create a neat and clean workspace, but will also benefit the lifetime of your device due to the reduction intake of dust and dirt.

The NM-TC100BLACK can be easily adjusted in width and depth to fit most thin client PCs.
